

材料科學與工程學系

Department of Materials Science and Engineering

演講公告

- ◎演講者：紀渥德副教授
- ◎服務單位：國立東華大學材料科學與工程學系
- ◎講題：Materials genome.
- ◎時間：109年6月1日（星期一）15:10-17:00
- ◎地點：理工二館第二講堂

ABSTRACT

The modern techniques allow scientists and engineers for fast and efficient prediction of materials properties. Therefore, in recent years, materials design and materials applications speeded up drastically. One of the most important part of the so-called materials by design approach is materials genome. In this talk a general information on materials by design and materials genome will be presented. Besides that, theoretical background and available software will be elaborated and some example will be shown.
